

Before the  
FEDERAL COMMUNICATIONS COMMISSION  
Washington, DC 20554

**RECEIVED**

DEC 10 1998

FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF THE SECRETARY

In the Matter of )  
 )  
Implementation of the )  
Pay Telephone Reclassification ) CC Docket No. 96-128  
and Compensation Provisions )  
of the Telecommunications Act of 1996 )

**PETITION FOR EXTENSION OF WAIVER**

GTE Service Corporation, on behalf of its local exchange carrier affiliates<sup>1</sup> (collectively herein "GTE"), respectfully requests that the Commission grant a limited extension of a previously authorized waiver, until June 30, 1999, of the requirement to provide payphone lines capable of passing payphone-specific coding digits. As described more fully below, this limited waiver would apply only to approximately 5% of GTE's 191,000 payphone lines.

GTE seeks this limited extension due to two factors, both beyond the control of GTE, which will delay GTE's ability for full implementation: Certain GTE end offices which subtend non-affiliated carriers' tandems that are not flexible automatic numbering identification ("Flex-ANI") capable at the tandem level are consequently not yet Flex-ANI capable at the end office level; and Lucent will not be able to provide the required Flex-ANI software upgrade packages for the GTE Lucent tandems until March 1999. Nonetheless, based upon the commitments received, GTE believes it can be in 100% compliance by June 30, 1999.

<sup>1</sup> GTE Alaska, Incorporated, GTE Arkansas Incorporated, GTE California Incorporated, GTE Florida Incorporated, GTE Hawaiian Telephone Company Incorporated, The Micronesian Telecommunications Corporation, GTE Midwest Incorporated, GTE North Incorporated, GTE Northwest Incorporated, GTE South

## **Original Waiver and Current Status**

The Memorandum Opinion and Order ("MO&O") in this proceeding<sup>2</sup> designated automatic number information indicators ("ANI ii") and Flex-ANI as acceptable methods to provide payphone-specific coding digits. Recognizing that it would take additional time for the local exchange carriers ("LECs") to implement these changes, the MO&O also granted waivers to allow some LECs, including GTE, until September 30, 1998 to provide Flex-ANI for 75% of the smart payphones in their service areas, and until December 31, 1998 to complete the Flex-ANI implementation to the remaining 25% of the smart phones in their service territories.

GTE has worked diligently since the release of the MO&O to convert all of its tandem switches serving end offices to full Flex-ANI capability. GTE met the requirement for 75% implementation by the September 30, 1998 deadline. Further, GTE has completed all of the remaining Flex-ANI software installations, except for switches serving less than 5% of the 191,000 payphone lines in GTE. Accordingly, GTE currently deploys full Flex-ANI capability to over 95% of the payphones served.

## **Limited Extension of Waiver**

GTE has been steadily progressing toward completion of its Flex-ANI implementation to meet the second compliance date of December 31, 1998. However, GTE now finds that two implementation issues will delay GTE's ability to complete this implementation by the end of 1998.

---

Incorporated, GTE Southwest Incorporated, Contel of Minnesota, Inc., GTE West Coast Incorporated, and Contel of the South, Inc.

<sup>2</sup> *Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996*, Memorandum Opinion and Order, CC Docket No. 96-128, DA 98-481, released March 9, 1998.

First, GTE tandems were manufactured by several different manufacturers. Although GTE has diligently requested appropriate upgrades from the manufacturers of these switches, one of those manufacturers, Lucent, advised GTE in September 1998 that it would not have the required Flex-ANI software upgrade packages available until March 1999. (See Exhibit 1). GTE has been unable to obtain an earlier date from this manufacturer. This upgrade affects approximately 792 COCOT lines in the 17 GTE Lucent access tandems (See Exhibit 2).

Second, GTE has been upgrading its tandem switches with the Flex-ANI software technology. Since GTE has approximately 5000 end offices, it elected, for legitimate cost reasons, to deploy Flex-ANI software technology at the tandem office level. Most of the other major LECs, including those with whom GTE has end offices subtending their access tandems, elected to provide Flex-ANI at the end office level. Therefore, GTE finds that it has had to work with these non-affiliated LECs to provide the Flex-ANI capability in the tandem so that the subtending GTE end offices can comply. GTE has been in regular contact with the owners of the tandems in which GTE offices subtend. Where possible, GTE identified and corrected any of the problems that surfaced during the installation and implementation effort. However, certain of these tandems have not yet been appropriately upgraded with the necessary software. Only 7864 of GTE's COCOT lines are affected by this lack of upgrade at the non-affiliated LEC tandems. (See Exhibit 3).

GTE does not anticipate that this requested extension of time to complete the implementation will significantly disrupt interexchange carrier plans to utilize Flex-ANI service. Customer demand nationwide has been slow to develop in areas where Flex-

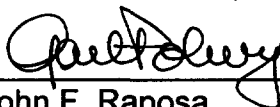

ANI is tariffed and available. To date, no carrier has ordered Flex-ANI service in the areas currently without Flex-ANI capability.

As a result of the two situations noted above, less than 4.75% of the payphones in GTE's service areas will not have Flex-ANI capability until mid-1999. Accordingly, GTE respectfully requests that the original waiver deadline of December 31, 1998 be extended for this small number of payphones lines until June 30, 1999. The additional six months will allow for software receipt, installation and testing in the Lucent switches, as well as in the tandems of non-affiliated LECs. GTE is willing to take any and all measures to work with these LECs to expedite installation and testing of the software to provide Flex-ANI to GTE's subtending end offices.

December 10, 1998

Respectfully submitted,

GTE Service Corporation and its local exchange  
carrier affiliates

Re: Availability of Lucent Technologies 5ESS®-2000 Flexible ANI Features:

Norm,

This letter is in response to your recent inquiry regarding the availability of Lucent Technologies' Flexible ANI features *99-CP-4847 Toll Free Calling Enhancement for Flexible ANI* and *99-SP-4868 Pay Phone Compensation for Toll Free Calls*.

The current anticipated availability of these features is *March, 1999*.

Please feel free to contact me if you require any additional information or details on these features. Thank you for considering Lucent Technologies in building your network at GTE.

Regards,

Copy:
